

For Hardware Retailer: At the beginning, simultaneously complete the following steps. First, package the goods. If the goods require a "Special Carrier", then request quotes from carriers. Otherwise, check if extra insurance is necessary and decide if normal post or special shipment is required. After requesting quotes from carriers, assign a carrier and prepare the necessary paperwork. If the goods always require a post label, fill in the label. If extra insurance is required, take out the additional insurance. Add the paperwork and move the package to the pick area. Once the goods are available for pick, the process ends. If extra insurance is required, take out the additional insurance.
